2015

2010 DESIGN EXCELLENCE

ROMANCE VALLEY 2008

It is a simple geometric shape (cube), which highlights the site's mountainous terrain. The house captures the view of the valley towards the South, and the mountain range towards the North and North West. The different levels at terraces makes the interesting habitable spaces compliment with different views. The infinity pool, merged with the sky screen, give the some what unusual experience to the occupations.

The dialog between the building and its setting is critical, if it is to appear harmonious. The house is a concrete and steel / glass box elevated on a mountain terrain. The surrounding nature is clearly different to the material used, which gives the benefit to the occupant to feel the difference while being in the comfort.

The house is open with huge glass panels to capture the every bit of the surrounding. Although it looks somewhat alienate to its immediate surroundings, the setting has made the difference to blend the building with the terrains.

EFL CAMPUS ACCREDITED AS SRI LANKA'S FIRST LEED GOLD FACILITY

Sri Lanka's first and only LEED Gold Certified Warehouse. LEED (Leadership in Energy & Environmental Design) is a green building certification program developed by USGBC that recognizes best-in-class building strategies and practices. To receive LEED certification, building projects have to earn points based on design and usage with Gold being the second highest tier in the points table. This marks a new and significant milestone for EFL in their continued effort to focus on sustainability in all their operations and business practices.

AWARD

THE TAMARIND 2005

The design approach was based on a review of the condition of the site and its shape, and to respond to its surroundings. The functions related to each other had to be considered as well. The 'L' shape configuration of the main building allowed the creation of a versatile interior. The different spaces receiving through the house make each other to create many views and vistas. The extension of the interior spaces towards the exterior linked perfectly with its intermediate spaces and makes it blend with the immediate nature. The approach also makes a harmonious relationship between the interior and exterior by its shape and focus, which austerity to reflect the surroundings.

COMMUNITY

CUBE HOUSE 2009

The rectangular cube has emerge from the bank of the lake to capture the view across the ripple of the water towards the lush greenery beyond. It is a place relax and rejuvenate yourself, and enjoy the nature. The main structure is concrete and bricks raised from the bank of the lake to get the maximum benefit of the view. The wide glass panels and elevated floor allows you to capture wide perspective from the living room and bed rooms as well as it links the nature and the building together. The simple cube added the contrast to the surround by its own shape and its reaction to the lights falling to the building during the day. In the morning it is started to glitter with the rising sun light and hide in the noon with direct sun in barren bank of the lake, The evening is different falling sunlight and shadow make romantic atmosphere.

'WHITE LOTUS' HOUSE AT BOLGODA

2013

The Dutch and colonial influence in Sri Lankan architecture is still established in people's minds. The home is inspired from the detailing and composition of the Dutch colonial architecture expressing a contemporary feeling. Orientating the building to expose the most out to the captive Bolgoda Lake and placing it to preserve the large garden area the building takes you through a journey towards the lake through articulations of space, volume and light. All the spaces are designed focusing on capturing the view of the lake. The series of internal and external spaces lead from entrance verandah to the water courts and the double height colonial the special progression towards the lake view. The gorgeous elegance in the outlook and the interior has made the dominance of this establishment. Courts and the double height colonial the special progression towards the lake view. The gorgeous elegance in the outlook and the interior has made the dominance of this establishment.
